

### **Remarks**

Claim 16 has been amended to include all the limitations of claim 9. Thus, there is now a common technical feature. Applicants' attorney apologizes for not amending claim 16 in the previous response, which was intended.

The term "solids content" is used in the fields of emulsions and dispersions to refer to the content of dispersed phase, regardless of whether this phase is solid or liquid. One skilled in the art is very aware of this usage, which is reflected in many, many issued and published U.S. patent applications as well as numerous scientific publications.

With the above comments in mind, the Restriction Requirement is respectfully traversed.

Respectfully submitted,

**OTTO SCHNEIDER ET AL.**
